

MB Docket No 04-233

I am writing with regard to the potential of having our local KLOVE station forced off the air due to the new LPFM service. I understand that this new service would be given preference to existing MF translator services.

KLOVE is the radio station that me and many of my friends and family listen to, almost exclusively. It is a positive stations that encourages people to live good, Christian lives.

There is no guarantee that a new LPFM station would carry any type of programming that would offset the loss of KLOVE. It is in the public interest to allow for KLOVE and other stations that use FM Translators to be able to keep their current priority on the FM bands so that the public can continue to benefit from family-friendly programming KLOVE provides.

We listen to KLOVE in Denver on 91.1 FM.

Thanks for your consideration of the interests of the public your organization serves.

Matthew
